

Mrs. Karen T. Danis has been working as a Knowledge Management consultant since she retired from Federal government in April 2006, having held the position of Technical Manager for Knowledge Management (KM) for the Naval Sea Systems Command activity in Keyport, Washington, as well as the U.S. Department of the Navy (DON) Chief Information Officer (CIO) Knowledge Liaison to the Pacific Northwest.

Most recently she assisted a Navy organization with Knowledge Retention as an employee of ManTech International. Prior to that engagement she supported the American Productivity and Quality Center's major benchmarking study, "Retaining Today's Knowledge for Tomorrow's Workforce" as a Subject Matter Expert in the areas of Human Capital Management and Knowledge Management. She has 30 years of experience in Washington, DC, last with the Enterprise Knowledge Team, Office of the DON CIO. Prior to that assignment she was the DON CIO Program Lead for Information Management/Information Technology (IM/IT) Competencies, responsible for building the KM, IM, and IT competencies within the DON workforce that are expected to shape the DON and enable its vision and resultant maritime strategies. She has been a KM/IM/IT professional for over 30 years, having held senior leadership positions in process reinvention and metrics, and policy governing acquisition of information resources. She is a certified U.S. Department of Defense Acquisition Professional.

She has owned a retail business and co-founded a non-profit organization. In 2004 she retired as a Captain in the U. S. Navy Reserve. She holds a B.S. in Computer Science from The American University, an M.S. in Information Resources Management (Federal Government) from Syracuse University, and professional endorsements as a Certified Knowledge Manager and Certified Knowledge Environmental Engineer.
